Air Conditioning & Interior Disinfection Service

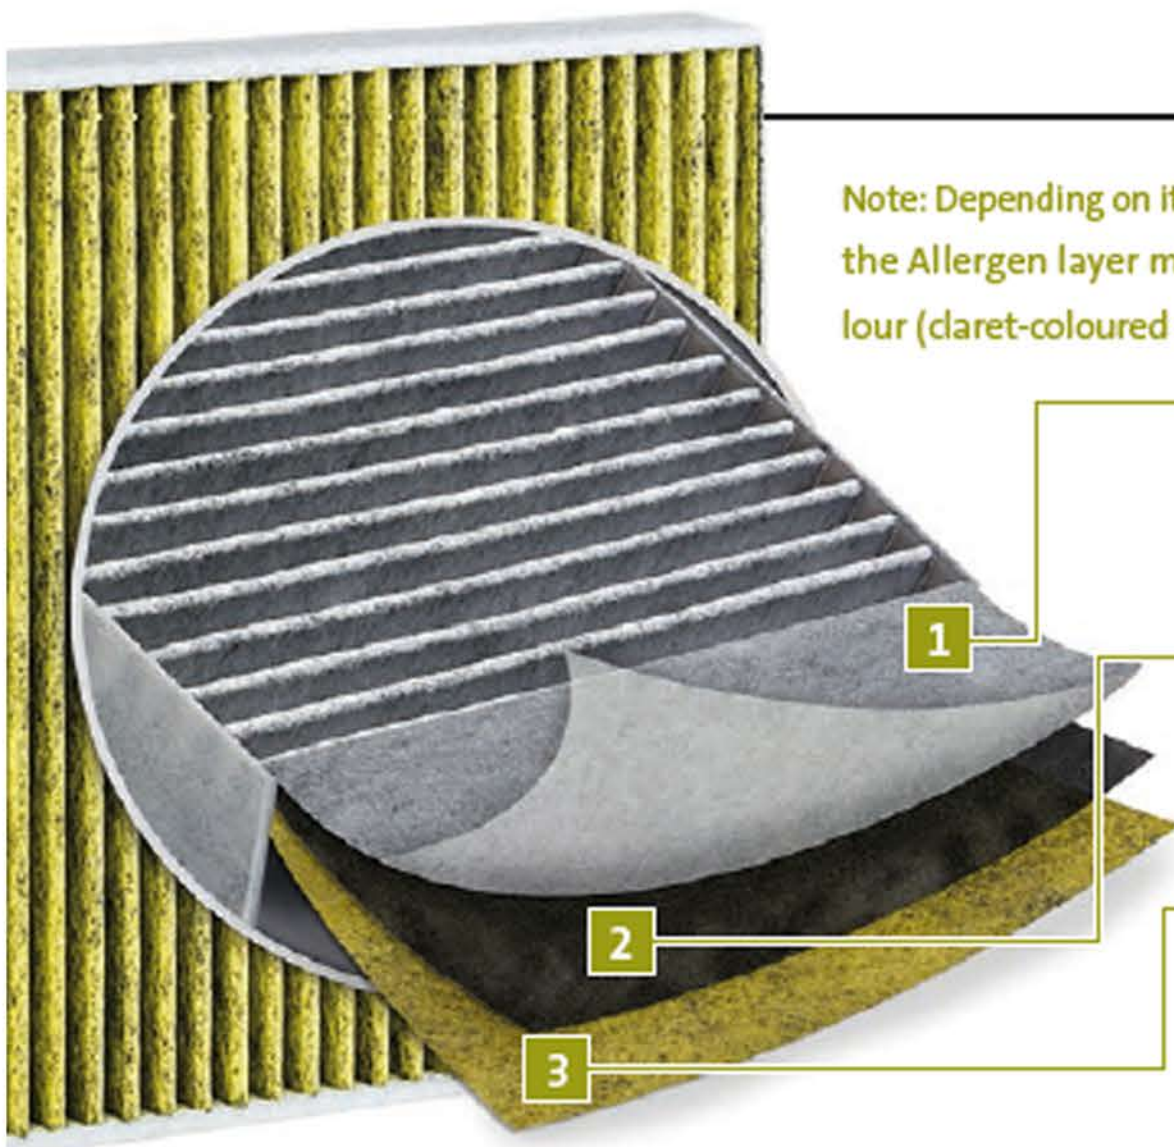

Purification Power Only for You

Volkswagen Air Conditioning & Interior Disinfection Package

Volkswagen are offering you a new "Air Conditioning & Interior Disinfection Package" at HK\$1,388. By using ultrasonic medium to deodorize, clean and disinfect the air conditioner and evaporator, as well as replacing a new Volkswagen genuine pollen filter, the service effectively filters a large range of odour smell and harmful substances.

customers can enjoy upgrading to "Odour and allergen filter"[#] at special price HK\$150.

Three-fold protection with natural active ingredients

Note: Depending on its manufacture, the Allergen layer may vary in colour (claret-coloured or colourless).

The innovative filtration performance of Volkswagen AG's Allergen filter is due to its very special design:

Particle filter layer

An efficient filter medium captures pollen, diesel soot, spirable dust.

Activated charcoal layer

Binds unpleasant odours and harmful gases, including sulphur oxides and nitrogen oxides.

Allergen removal layer

Here the active ingredient, such as polyphenol, envelops allergens and can effectively deactivate them.

Source: MANN & HUMMEL GmbH and Volkswagen AG

"Air-Conditioning and Interior Disinfection Package" plus replacing "Allergen filter" will cost HK\$1,538.

* Sharan series require additional cleaning and disinfection service for the front and rear seat air-conditioning system.

Should any dispute arise, the decision of Kam Lung Motors Limited shall be final.
